ORGANIZATION CHART

FIRE DEPARTMENT OVERVIEW

Five fire stations are located throughout the village. The department offers emergency response services including fire, ambulance, hazardous materials, underwater rescue and recovery, high angle, trench and confined space rescue; and education/fire prevention programs including school presentations, an open house, station tours, high rise drills, and Explorer Scout Post 333.

KEY ACTIVITIES

The Schaumburg Fire Department responded to 812 incidents in July 2017. Emergency medical service requests accounted for 583 or 72% of the monthly total. The remaining 229 or 28% of the incidents were fire/rescue related requests.

There was one structure fire loss for the month of July to report.

925 Cornell Ln.

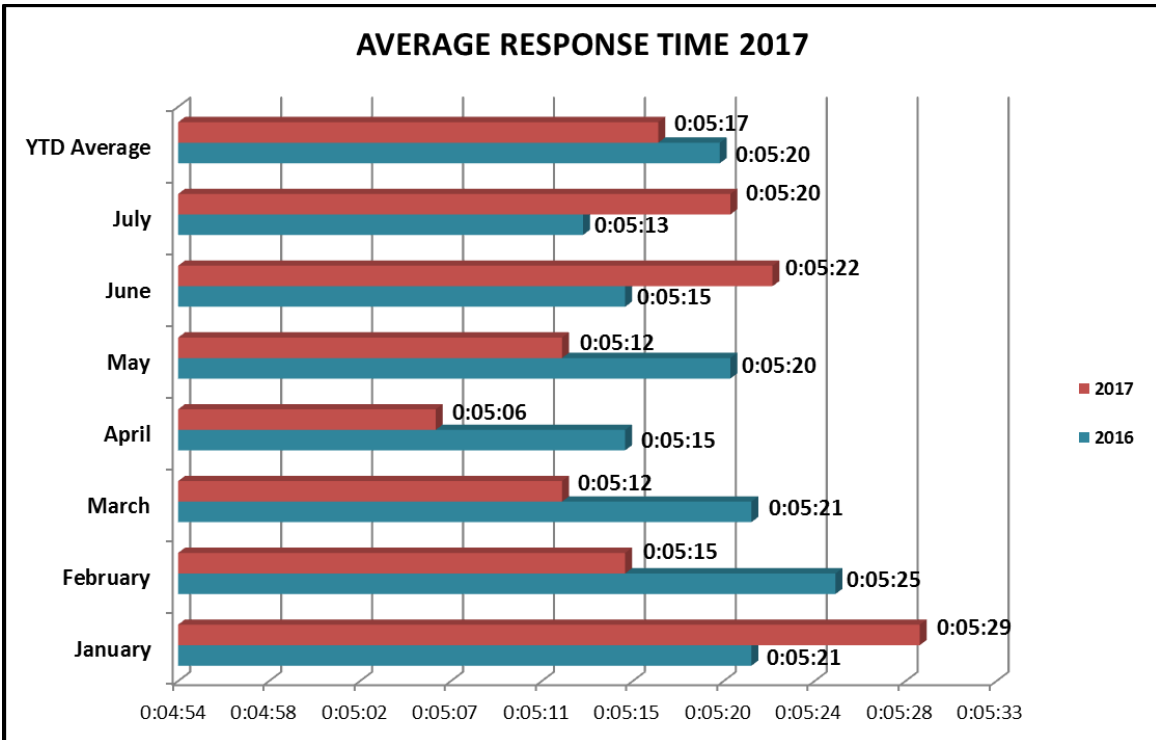

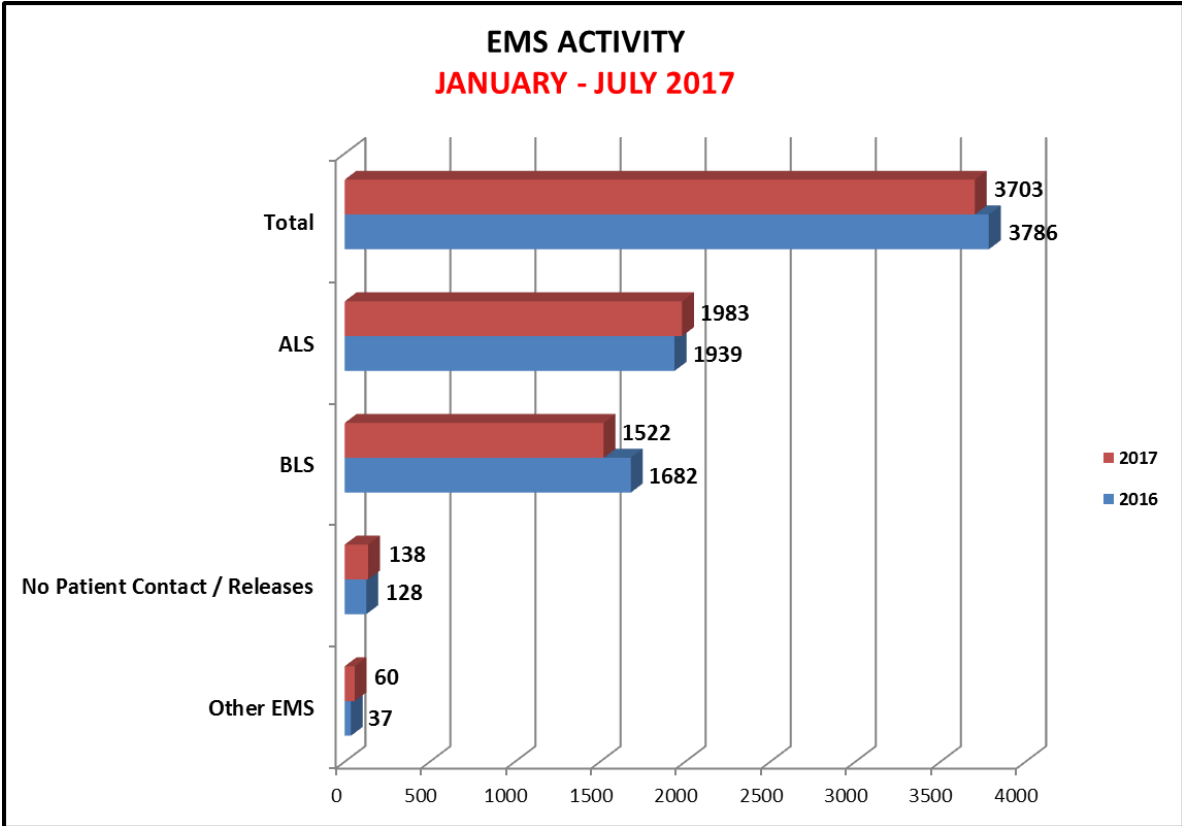

Origin: Basement

Cause: Electrical

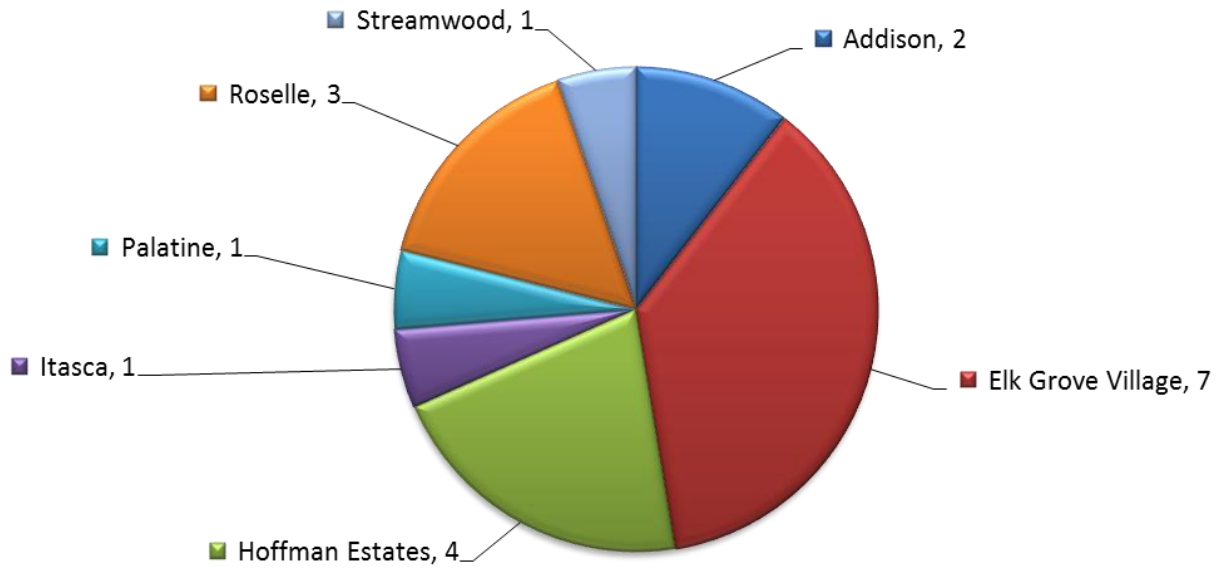

Mutual aid was provided to other communities for 19 total incidents and was requested by Schaumburg for 17 total incidents.

MONTHLY PERFORMANCE

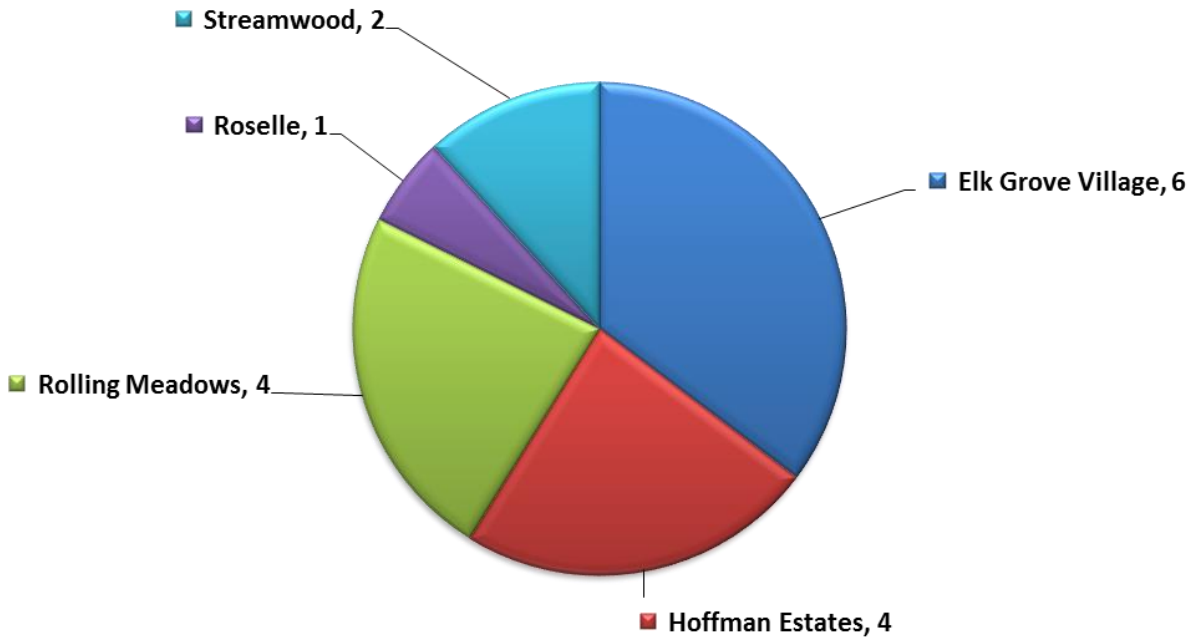

MUTUAL AID "GIVEN" - JULY 2017
19 INCIDENTS

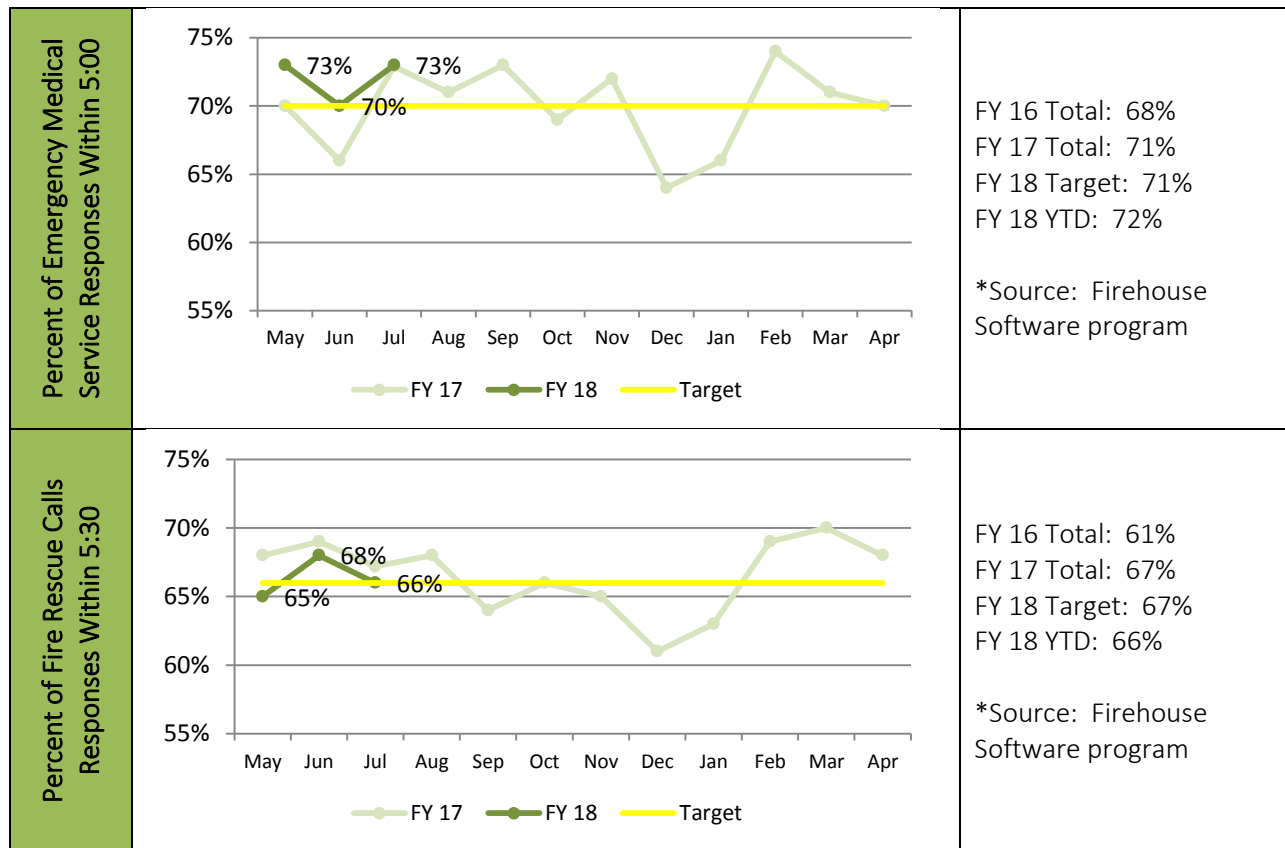

MUTUAL AID "RECEIVED" - JULY 2017
17 INCIDENTS

KEY PERFORMANCE INDICATORS

KPI 1: Emergency Response Time

Studies show that faster fire response times result in less fire loss and have a positive influence on patient care for emergency medical calls. This KPI measures the percent of calls in which the first apparatus arrives within five minutes for emergency medical service (EMS) calls and five minutes and thirty seconds for fire rescue calls. The response time identified in this KPI includes the time from which personnel are dispatched until they arrive on the incident scene. National Fire Protection Association Standard (NFPA) 1710 has established a standard travel time of four minutes. NFPA 1710 has also identified a standard of 60 seconds for EMS turnout time, and the Commission of Fire Accreditation International recommends a 90 second turnout time for fire rescue calls. Turnout time is defined as the interval that begins with the notification of fire personnel and ends at the beginning of travel. The Fire Department is currently undergoing an accreditation process and will be setting new benchmarks consistent with the standards identified through that process. This will be reflected sometime during FY 2017/18.

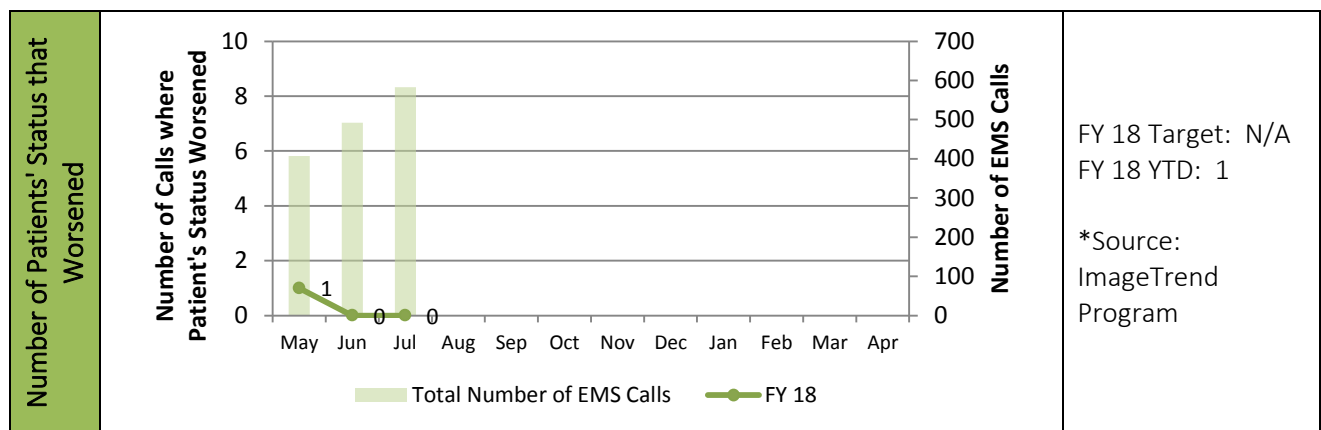

KPI 2: Total Dollar Loss

One of the most critical objectives of the fire department is to reduce the impact of fire in the community. By measuring total dollar loss, the department can determine how effective they are at completing this objective. The community's total dollar loss can be reduced through effective community risk reduction campaigns and effective fire suppression tactics. Total dollar loss that occurs as a result of structure fires consists of the value of the building and the value of the contents.

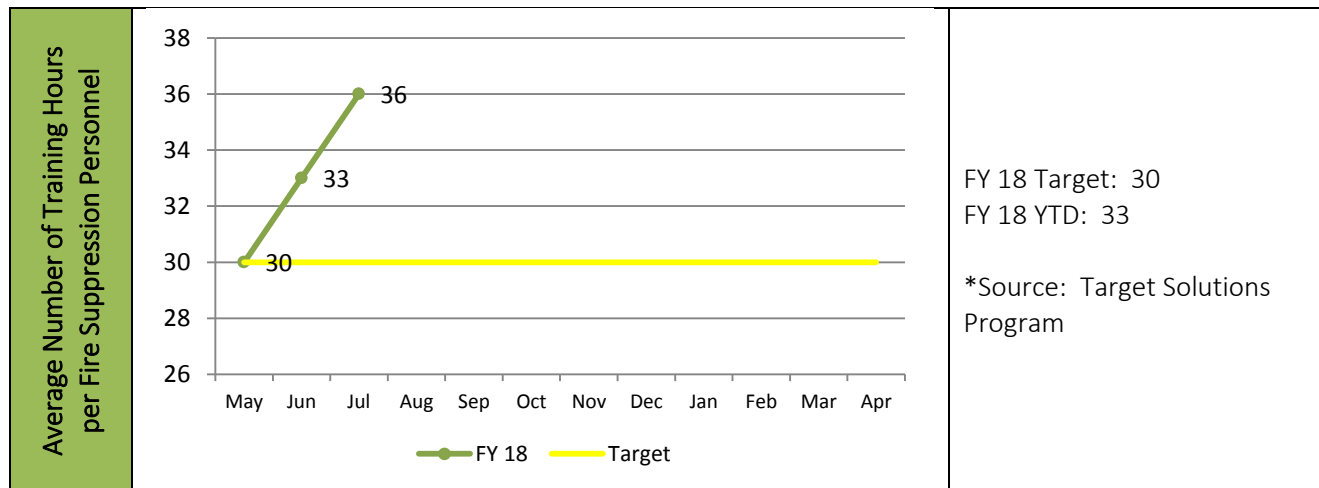

KPI 3: EMS Patient Activity

The EMS Division seeks to provide the highest quality care for all patients, which can be demonstrated through the patient activity while in our care. Fire Department EMS personnel complete a report for each patient that has received care. This report includes a field that indicates whether the final patient's acuity was unchanged, improved, or worsened during our care. This KPI will measure the number of patients whose status worsened within our care. Due to lack of previous data, the results will be collected during FY 2017/18 and this data will be used to set a benchmark in FY 2018/19.

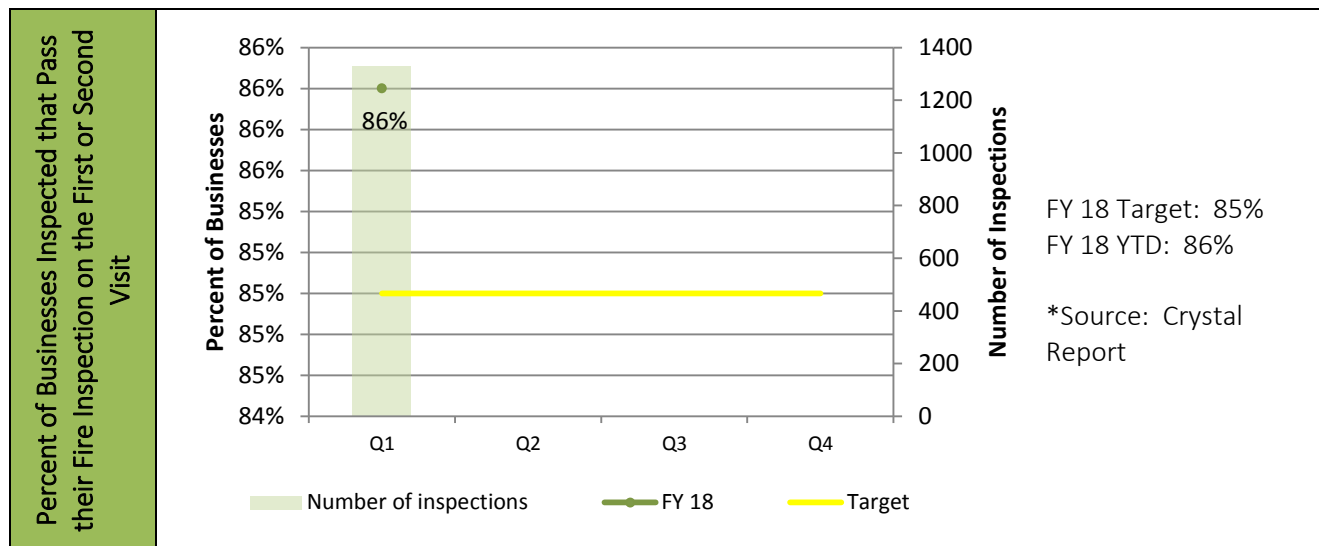

KPI 4: Average Training Hours

The amount of time that the fire department invests in training can influence the abilities of personnel during emergency events. The department strives to maintain a highly skilled and well-prepared staff. This KPI measures the amount of training hours per the average fire suppression personnel (firefighter, lieutenant, captain) per month. The department averaged 15 hours per month during 2016 and will set the benchmark for FY17-18 at 16 hours per month.

KPI 5: Fire Inspection Compliance

Fire inspections are conducted to ensure a reasonable degree of safety. Businesses that maintain their facility free of fire code deficiencies minimize their risks from fire and other hazards. This KPI will measure the percent of businesses inspected pass their fire inspection on the first or second visit. This will include inspections conducted by the fire inspectors and fire companies. Over the past three years, the department has averaged about 84% and the benchmark will be set at 85%.

KPI 6: Fire Safety Program Effectiveness

Effective public education programs will illustrate that knowledge has been gained that will lead to safer behaviors. This KPI will measure the success of the school-based education program and building evacuation program through pre- and post-tests. The department will measure the difference in the two scores, which will demonstrate an increase in knowledge. Due to recent changes in these programs, the department will measure the data in FY 2017/18 and utilize this information to set a benchmark in FY 2018/19.

COMMUNITY RISK REDUCTION

The Community Risk Reduction division provides a holistic approach to fire prevention and safety. The purpose of the division is to reduce the risk of fire and all hazards through various methods, including public education and inspections.

Public Education

- High-rise evacuation drill witnessed at 425 and 475 Martingale.
- Public Education Officer gave summer fire safety tips during Speaking of Schaumburg taping to air in August on community cable channel.
- Public Education Officer attended Olde Schaumburg Centre Farmers Market booth, provided life and fire safety brochures and promotional items.
- Two Home Safety Visits were conducted.

Fire Inspections

Fire Inspectors completed inspections in high-rise buildings, gas stations, and grocery stores.

Fire Inspections for July 2017 = 91

Re-Inspections for July 2017 = 467

Permit Related Inspections for July 2017 = 94

Fire Inspector Total Inspections for July 2017 = 652

Total Fire Inspections for 2017 = 1,775

Total Re-Inspections for 2017 = 1,211

Total Permit Related Inspections for 2017 = 716

Fire Inspector Total Inspections for 2017 = 3,702

Fire Company Inspections were conducted in businesses.

Fire Company Inspections for July 2017 = 93

Fire Company Re-Inspections for July 2017 = 5

Total Company Inspections for 2017 = 481

Total Company Re-Inspections for 2017 = 92
